Hardback. Book Condition: New. Not Signed; Leading scientists review and explain the state of the science With chapters contributed by pioneers and leading scientists in the field, this carefully edited work provides state-of-the-science reviews focusing on the structural and dynamic aspects of diverse membranous systems. In addition to learning the significance of the latest discoveries in membranous systems, readers also learn the most advanced techniques used to study these complex systems. Moreover, the text brings together a tremendous array of both published and unpublished data, offering an unprecedented reference and resource to fuel further research. Integrating findings from computer science, biophysics, surface science, physical chemistry, nanotechnology, biochemistry, chemical engineering, materials science, and clinical physiology, this book offers a truly multidisciplinary perspective. Its fifteen chapters are organized into three main sections: \* Membrane Structure, focusing on direct experimental studies to determine the polymorphic structures of model and natural membranous systems \* Dynamics & Molecular Events at Membrane Interfaces, examining how membrane structures are formed and evolve into other superstructures \* Complex Membranous Systems, exploring bacterial and neural membranes, lung surfactants, and other colloidal systems Structure and Dynamics of Membranous Interfaces offers researchers and students studying biomembranes a unique snapshot of what is known in the field, where additional research is needed, and where the field is heading. Furthermore, armed with a better understanding of membranous systems, readers are well positioned to make new advances in such areas as drug design, medicine, and environmental technologies. book.
