Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Ex Libris: The Pennsylvania Horticultural Society Fortunately, for practical and altogether satisfactory results, the fertilizing problem of the dahlia is very simple. This is not true of all plants. A good grass lawn is often difficult to secure. Fifteen years of experiments with elaborate chemical fertilizers, used with manure, failed utterly to produce a lawn around the Tampa, Florida, post office, in the clear sand. Finally, three months use of soft phosphate and cow manure was found to be just right, and a beautiful grass lawn was the result. Lime is poison to rhododendrons and azaleas, but is required as an aid in turning starch into sugar, in the structure of most plants, and its use means fruits and vegetables of better flavor. The use of lime is a broad subject, and applications cannot be suggested without knowledge of the particular soil to be treated, for the ground may be heavy, light, sandy, or clay, and lime may or may not have been recently applied. Lime has been used in agriculture for more than two thousand years, and its necessity and its value has been fully proven. If your soil is light excessive use of lime will cause trouble. On heavy soils reasonable and moderate applications of lime, either burned or slaked, will make the ground friable; but will compact light soils. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
