# NEUROSURGICAL APPLICATIONS OF TRANSCRANIAL DOPPLER SONOGRAPHY

Book Condition: New. Publisher/Verlag: Springer, Wien | In 1981, the Norwegian physiologist and cyberneticist, Rune Aaslid, developed a device which made it possible to apply the transcranial Doppler sonographic technique in man. In 1983, Dr. Albrecht Harders took on the project of working out a clinically practicable method that would allow atraumatic measurements to be made of the blood flow velocity in the large branches of the circle of Willis. The technique has now become a competitor of the conventional methods...

## Reviews

---

*The most effective publication I have ever read. This is certainly for all those who state that there had not been a worthy of looking at. It's been printed in an extremely straightforward way which is merely soon after I finished reading this publication where basically changed me, change the way in my opinion.*
