## PROGRESS IN SURGICAL PATHOLOGY VOLUME VI

Springer. Paperback. Condition: New. 194 pages. Dimensions: 9.9in. x 6.9in. x 0.6in. The series of volumes Progress in Surgical Pathology was conceived in an attempt to honor the 70th birthday of Dr. Raffaele Lattes. The original volumes were the result of an initial call for papers dedicated to progress in the field of surgical pathology with contributors from all over the world. The papers published in these volumes have represented examples of classical clinical pathologic correlations within the discipline of surgical pathology; other papers reflect the work being done at the interface between classical diagnostic surgical pathology and research in the realm of immunology, molecular biology, cell biology, etc. These papers illustrate what is possible utilizing all of the advances made in basic biology, while remembering that the pathologist remains an essential, crucial figure in the analysis of tissues, both with respect to their diagnosis as well as the analysis of the dynamic interactions between cells. There have also been papers that may be characterized as philosophical or historical, which look at aspects of surgical pathology in a unique way. Five volumes have been published since 1980. The last of these was published in 1983. For those of you who have been our loyal readers, you may wonder why there has been a gap in the publication of these volumes. This has been due to reorganization both among ourselves as well as with the publisher. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
